_____ <i>(Signature of person authorized to sign)</i>		BY _____ <i>(Signature of Contracting Officer)</i>	

## **Questions and Answers and Information regarding Solicitation DTFANM-12-R-00055**

Q 1. Please confirm the AAC Requirement goals for the Project per page 22 of the solicitation, par. 3.6.2-24 (c).

**A 1: Solicitation, page 22, is corrected. Thank you for this question.**

Q 2. Please confirm the work required for the tower on the North side of the building at the Bliss site.

**A 2: At Bliss, only the four legged tower east of building as indicated at site meeting requires work. Another smaller tower at north side of building is not included in this project.**

Q 3. Please confirm which guy wires shall be replaced entirely, vs. just retensioned.

**A 3: I do not expect to need cable replacement in this project. I do expect replacement of bent or defective turnbuckles and addition of shackles as needed during tensioning. Turnbuckles shall have at least 1 inch of free threading after tensioning.**

Q 4. Please confirm the work required for the ground wire replacement as mentioned at the walkthrough.

**A 4: Grounding on all Guy cables at both Paul and Bonanza Lake shall be up graded to latest IEEE requirements and current industry standard.**

Q 5. Ref.: Bliss, ID, Site – Please provide the soil report as referenced in drawing # QUP-D-RCF-S001. If the report is not available, are we to assume normal soil conditions?

**A 5: It is a requirement of the contractor to determine soil condition by on-site testing and to design and install footing in compliance with all engineering requirements. Contractor is not to assume soil conditions.**

Q 6. Ref.: Paul and Bonanza Lake, ID, Sites – Please verify that guy wire replacement is not required. Section headings and Section B mention guy wire replacements at these sites, but the items listed under the CLINs do not include guy wire replacement and information reviewed at the pre-bid meeting did not mention replacement – just retensioning.

**A 6: I do not expect to need cable replacement in this project. I do expect replacement of bent or defective turnbuckles and addition of shackles as needed during tensioning. Turnbuckles shall have at least 1 inch of free threading after tensioning.**

**>> Was asked height of Paul and Bonanza Lake RCL towers: I do not have an exact height. Based on number of segments and using 10 ft per segment I would estimate Paul tower at around 165ft and Bonanza Lake at about 200ft.**
